

Reminder: Only Glass Goes in the Recycling Bins Behind the Symphony Office!

For the first time since our First Church glass recycling program began two years ago, someone has used one of the bins for cardboard rather than glass.

Please, please spread the word that the gray bins with red lids located next door to the church, behind the Missoula Symphony Office, are ONLY for the glass we collect as part of our recycling program.

One of our Green Team members had to remove all the cardboard from the bin and haul it away to a recycling center. That's a lot of extra work – and very worrisome since we need all the gray bins open for our glass recyclers! In fact, the bins belong to Recycling Works, which picks up the glass every other week – but only glass!

If you would like to join First Church's glass recycling program, please email Sherry Devlin at sherrydevlin@gmail.com. The cost is \$5 per month.

Once again, the bins are only to be used to recycle glass. Thank you so very much for all your help and support over these past few years. Our glass program continues to grow, and makes a real difference for the environment.
